PULSECOIN

$PULSE

Bridging Blockchain and Renewable Energy Investment

Whitepaper · Version 1.0 · 2026

Token Name	PulseCoin
Ticker	PULSE
Network	BNB Smart Chain
Standard	BEP-20
Max Supply	10,000,000,000,000 PULSE
Decimals	8
Launch Year	2022
Contract Status	Verified

Contract: 0xd6500d0b6683b03022000429e259dc606c09471b

1. Executive Summary

PulseCoin ($PULSE) is a BEP-20 digital asset launched in 2022 on the BNB Smart Chain, designed with a long-term vision of bridging blockchain capital with renewable energy opportunities worldwide. With a fixed maximum supply of 10,000,000,000,000 PULSE and a verified, transparent smart contract, PulseCoin positions itself as an infrastructure-aligned token for the global energy transition.

- Verified BEP-20 smart contract on BNB Smart Chain
- Fixed maximum supply of 10 trillion PULSE
- Mission focused on renewable energy and sustainability
- Long-term roadmap spanning 2026–2030

2. Mission & Vision

PulseCoin exists to support innovation and sustainable development through blockchain technology. The project seeks to build a future ecosystem where tokenized capital can contribute to renewable energy initiatives, infrastructure projects, and sustainable investments across global markets — combining the transparency of on-chain assets with the real-world impact of clean energy.

- Bridge blockchain capital and renewable energy
- Promote transparent, decentralized infrastructure funding
- Build a globally scalable sustainability ecosystem

3. Market Opportunity

Global investment in the energy transition continues to accelerate, with renewables, storage, and grid infrastructure forming a multi-trillion-dollar opportunity. Blockchain rails offer transparency, programmability, and global accessibility — yet remain underutilized in the clean-energy sector. PulseCoin targets this intersection.

- Trillion-dollar renewable energy investment cycle
- Growing institutional appetite for ESG-aligned digital assets
- Underserved bridge between DeFi liquidity and energy infrastructure

4. Technology

PulseCoin is implemented as a standard BEP-20 token on the BNB Smart Chain, ensuring broad wallet, exchange, and DeFi compatibility. The contract is publicly verified on BscScan, enabling transparent auditing of supply, transfers, and holder distribution.

- Network: BNB Smart Chain
- Standard: BEP-20
- Decimals: 8
- Contract status: Verified on BscScan
- Contract: 0xd6500d0b6683b03022000429e259dc606c09471b

5. Tokenomics

The 10 trillion PULSE supply is allocated across community growth, liquidity, a dedicated renewable energy reserve, exchange listings, marketing, and core operations. The model prioritizes long-term holder alignment and sustainable ecosystem development.

- Community Growth — 40%
- Liquidity Development — 20%
- Renewable Energy Reserve Fund — 15%
- Exchange Listings — 10%
- Marketing & Partnerships — 10%
- Team & Operations — 5%

6. Roadmap 2026–2030

PulseCoin's roadmap is structured in annual phases focused on community, utility, partnerships, and real-world sustainability initiatives.

- 2026 — Community Relaunch, Website Expansion, Exchange Outreach
- 2027 — New Partnerships, Token Utility Expansion, Renewable Energy Research
- 2028 — Pilot Sustainability Initiatives, Global Community Growth
- 2029 — Strategic Collaborations, Infrastructure Development
- 2030 — Global Renewable Energy Ecosystem Vision

7. Governance & Transparency

All token activity is publicly auditable on-chain. PulseCoin is committed to publishing ongoing transparency updates, pursuing independent audits, and engaging the community in the evolution of the ecosystem.

- On-chain transparency by default
- Planned independent smart contract audit
- CoinGecko and CoinMarketCap listing initiatives
- Community-driven engagement and reporting
